At Affectionately Cats your cat will be treated with a lot of TLC in their spacious cages, and will be fed, brushed, and bathed (if applicable). Boarding brings many cats from different places into one area. If a cat has an airborne virus unknown to Affectionately Cats it may be transferred before any symptoms can be seen. This puts other cats at risk. It is the goal of Affectionately Cats to protect out boarders from this risk. In order to do so, we require written documentation from you veterinarian of feline distemper vaccine, including Chlamydia, and FeLV/FIV testing, prior to admitting the cat into boarding. A cat that goes outdoors must be current on its FeLV vaccination; otherwise your cat will need to be retested for FeLV/FIV. A current Rabies vaccination is also required. If your pet develops any illness while in our care, Affectionately Cats has permission to treat and bill accordingly. Your cat will also be boarding in the cat condo size circled above, and you will be billed accordingly. By signing below, you agree with the above information, and with your estimate of services listed below.
